Mass Payment Solutions

Process high volumes of international and domestic payments, with one simple file upload. Schedule when you want your payments to be released and seamlessly utilise, spot, forward and market orders to purchase the required currencies. From royalty payments to payroll or redemptions you can rely on us.

Taking away your workload

Our mass payment platform allows you to seamlessly upload your bulk payments in one easy to manage file. Our Check and Fix solution (see below) will help you reduce payment failures before they happen by automatically pre checking beneficiary bank details prior to sending payment.

Validating payments this way can reduce failure rates, cut down on time and resources working out reasons for returned payments whilst delivering significant cost savings. Access your payments in real time, track and obtain confirmations instantly.

Limitless Performance

Our mass payment solution is scalable and flexible with the ability to send thousands of payments and can be adapted to meet your specific needs. Avoid wasted time and resources spent resolving returned payments.

Once set up, you will be able to send single, multiple, or mass payments with ease via our online platform. The process just got smoother, faster and more cost effective.
